

Re-location Project Garfish from North Pine Dam to Kurwongbar

The Saturday of our gar fish translocation was perfect no wind, nice weather and 39 eager anglers from Seniors to Juniors .This day was organized by one of the Bribie Island Jrs George he did an excellent job getting it all together which included emails, permission for access to the water sports site ,BBq and getting the Gar from one location to the other .>we are not sure of the final count but it would have been in the several hundreds ..thank you to all for your assistance and hopefully we will see the fruits of our labor in the coming years .Gazza
