## Inshore Fin Fish Have your say

### East Coast Inshore Fin Fish Fishery

Summary of proposed management changes

Are you a recreational fisher? Are you a commercial fisher? Are you involved in an organisation or industry that relies on fisheries, or do you simply enjoy locally caught seafood such as bream, whiting or flathead?

The Department of Primary Industry and Fisheries Queensland, (DPI&F) has reviewed the East Coast Inshore Fin Fish Fishery, which covers many of the important inshore species. A number of changes are proposed to the management of the fishery including new and amended bag and size limits, new netting arrangements and improvements to shark management.

We want to hear what you think about the proposed changes. Have your say before 17 March 2008.

### Have your say

This document summarises the proposed changes to management of the fishery. More detail about the proposals is available in the Regulatory Impact Statement and draft Public Benefit Test for the East Coast Inshore Fin Fish Fishery (RIS). The DPI&F will hold public meetings to discuss the proposed changes in early 2008. Check the website for details.

The DPI&F wants your comments on these proposals.

We must receive your response by 5 pm Monday 17 March 2008.

Copies of the RIS and a response form for your feedback are available at [www.dpi.qld.gov.au/fishweb](http://www.dpi.qld.gov.au/fishweb) or contact the DPI&F Business Information Centre on 13 25 23.
