

## All Tackle Length Only (ATLO) Landbased Division Guidelines

### About the ATLO Landbased Division

QLD Sportfishers (ANSA QLD) sees the establishment of the ATLO division as an opportunity for members, member families, and members with a disability or handicap who enjoy fishing off the banks, beaches, jetties and piers, the opportunity to experience and claim record captures.

### Definition:

An ATLO landbased capture can be claimed to have been made by a fisher when,

1. They are a current financial member of ANSA QLD.
2. During the entire time of fishing, including casting, hooking, playing and landing the fish, the fisher is standing or sitting on land or a landbased structure.
3. A landbased platform is defined as a pier, jetty, pontoon, or similar structure that is securely and permanently attached to land.
4. A capture made from any form of vessel that is affixed to a landbased structure at stage of fishing (refer to #2 for definition), does not constitute a landbased claim.

### Processing a Claim:

An ATLO record claim may be processed using the standard All Tackle Trophy Length Only Record Claim Form available on the ANSA QLD website under RESOURCES \_> RULES & FORMS

Link to RULES & FORMS - [www.ansaqld.com.au/rules-forms](http://www.ansaqld.com.au/rules-forms)

### Further Information:

Contact Helen Johnson (Records Officer) if you require further information or assistance in claiming a possible ATLO Landbased record.
